RESCUED FROM THE ELDERS. Collector Magone has very properly deter-

mined to return to their families in Europe the young girls brought over by the two Mormon elders, Walsh and Phillips, with been sent forward to their destination under

A few weeks ago Collector MAGONE raised the objection that some young people brought over by the Mormons under similar circumstances ought not to be allowed to land unless accompanied by their parents or guardians. But in that case the immigrants were passed through Castle Garden by Commissioner STEPHENSON. Now the Collector has peremptorily ordered that the children just arrived shall be returned to Europe.

This is a just decision. The Mormon elders have no rights over the children and no responsibility for them. They could abandon them at any moment if they so desired. Hence the children are here without parents or guardians to answer for their support, and under the provisions of the law must not be allowed to land in this country.

The Chicago nine, "Capt. CAR CONDUCTORS AND PASSENGERS.

"Conductor 113. Broadway and Seventh Avenue Road" favored us with a communication yesterday on our remarks about "careless conductors," which he regards as an "unjustifiable attack" on those worthy individuals, "made in mere wantonness."

We can assure No. 113 that THE EVENING World has a high appreciation of the value of car conductors; so much so, that it is mainly due to our efforts that the Twentythird Street Railroad Company and other bobtail corporations have been induced to change their system and put conductors on their cars. But No. 113 does not make out a good case for himself and his associates. He says that as the conductor is stationed on the back platform he is unable to see a passenger standing in the road waiting for the car before he is close to him. If he car before he is close to him. If he the car before he is close to him. If he then sounds the bell for the driver to stop, the headway of the car carries it quite a little distance, and he says it is easier for the pasger to await the next car, there being such a trifling interval between them, than to catch up with the first one he has hailed.

If a passenger stands in the road waiting for a car he is necessarily seen by the driver, who slackens the speed of his horses if there is any intention to stop. But aside from this, if Conductor 113 thinks the lan passenger may as well wait for the next car, Conductor 112 or 114, who comes after him. may think the same thing, and so may Conductor 111 or 115, who follows. Thus the unhappy passenger may be left standing for transing. G. M. Beale, of Syracuse, and C. P. Fegan, of St. Louis. an unlimited time, until he finds a conductor willing to take him on board, or may walk uptown, as he pleases.

We do not censure drivers or conductors in these cases. The Broadway employees are generally capable drivers and civil men. The company is to blame for requiring them to catch up to the schedule time, and if this TRETHING CORDIAL are exempt from pain, 15 cents.

Situated near Centre street is a manufactory located on the upper floor- of a large brick building, where mall-bags are made for the United States Government under a contract, and where a large force of men, women and young girls are employed. The following facts have been obtained from those who are ready to young for them as true.

ready to youch for them as true:
When the predecessor of the present party had the contract it is said that the saintary condition of the place and the hours of work and the prices paid were good and reason-able, but since the present party took charge everything has been radically changed for the worse as far as the workers are concerned, and this state of affairs has obtained for the

time work and discharging men who were employed as porters and belpers about the establishment, making the piece hands do all the packing, transferring and cleaning.

The prices of operators were reduced from \$1.75 per 100 bags to \$1.25, stampers were reduced from 20 cents to 10 cents a 100, the ringers, who sew the rings in the bags, had their prices cut from 5½ to 4 cents a bag, and stringers from 30 cents to 20 on the 100 bags. The next step at curtailing expenses in order that more money night be made by the contractor was a charge of 2 cents each for needles and a small charge for way.

The poor workers were also required to pay 50 cents for the thread used upon every 100 bags, and ringers were charged 20 cents for the buttonholes on each 100 bags placed in their hands. their hands.

their hands.

Under the old regime a good worker could make as high as \$3 a day, while now only 80 cents and \$1 can be made by the most rapid hands in the establishment. The old hands left shortly after the prices were reduced, and their foreman also quit and a new man took his place. Polish and Hungarian emi-grants or both saves and all ages were en-gaged in the places of the old hands, and it gaged in the places of the old hands, and it is openly charged that each of them was required to pay from \$3 to \$5 for the privilege of getting the work to do, and 50 cents for permission to carry work home. The labor is carried on seven days in the week and, it is said, at night.

The Evening Worlp's informants also state that when an applicant or employee restate that when an applicant or employee re-

The Interesting Subject Still Arousing Much Lively Discussion. To the Editor of The Evening World: Marriage is a failure to the masses because

a failure in home supplies creates domestic

infelicity, and this branch of the subject is perhaps more pregnant with disaster to domestic happiness than all other causes put domestic happiness than all other causes put together. The wage-workers are the masses and are true principally involved in the discussion of this great question. I have been a wage-worker for thirry years and never knew the time when I could have been justified in "taking to myself a wife" or incurring the obligations that attend the rearing of a family. My income has been too small and uncertain, and, although I have always been a steady, temperate man and paid for board a sum that would have give a good way to keep a home, yet I have been wrecked more than a dozen times by want of emiloyment, and think women ought not to be subjected to such chances of poverty, much less the children. chances of poverty, much less the children.
To the masses marriage is a failure because
our labor system, which is pretty much the
social system itself, is not adapted to secure social system itself, is not adapted to secure a regular I ving for the great mass of wageworkers. And it seems to me that our American labor reformers, male and female, in place of continuously and persistently meeting to hear each other growl and fret over their condition, would be doing better service for labor reform by organizing the masses to achieve a national system of land and cooperative labor, under which the means of lator and living would be secured to all, and marriage, as a rule, placed beyond the risk of failure.

Marriage Is a Daty. To the Edstor of The Evenena World:

None of your many thousands of readers have felt more of an interest in the subject now before the people through the agency of THE EVENING WORLD, than I, nor is there any of your many correspondents more deeply rooted in the idea that marriage is not a failure then I. Some have struck the right key whe they say that love should go further than the altar rail, further than watering places, further than the courting season, which to many is short and sweet. It is too true, as one of your correspondents of forty-one years' experience says, there are many fools who make a failure when they rush into matrimony at at immature age, without judgment, without sense (or cents) or a single serious thought of the future. Some girls believe that they should marry early for fear "man" might die out. No, Mr. Editor, marriage is the fulfilment of the divine law; it is our duty to ourselves, our God and to the world in which we live.

A Little Good Advice. to the Editor of The Frening Harld

I have read with interest the letters pubished in THE EVENING WORLD under the heading "Is Marriage a Failure?" I can frankly say from fifteen years of personal experience that marriage is not a failure. Although I am but thirty-two, I dare say few at sixty have passed through more trying expe-rences, but a wife's true love has been my greatest assistance through life. In most greatest assistance through life. In most cases I have known where marriage has seemed to be a failure, acquaintance had been short and true love for each other had never existed. In order to avoid the possibility of a failure, I would advise those single to be thoroughly acquainted, marry young, launch out for yourselves and steer clear of all relatives.

The Married Man's Mainstay.

o the Editor of The Evening World Marriage is not a failure. The great Washington Irving has said the same when he tells us that a married man, falling into misfortune, is more apt to retrieve his situation in the world than a single man, partiv because he is more stimulated to exertion by the necessities of the helpies, and beloved beings who depend upon him for subsistence, but chiefly because his spirits are soothed and re-lieved by domestic endearments, and his self-respect kept alive by finding that, though all abroad is darkness and humiliation, yet

Pedestrians stopped, looked at the dog a ninute and then fied for safety. Women minute and then fied for safety. Women shricked and made the best possible time for adjoining stores. GRATEFULLY OFFERED FOR HER SELF-SACRIFICE AND HEROISM.

the Has Started Out in the Proper Spirit Alan Dale Says, But Her Lack of Knowledge of Stage Rules is Proving a Drawback-She is Plucky, However, and Success May be Walting to Greet Her. My Dear Mrs, William O'Sullivan Dimpfel :

It is generally conceded that a man in whom

the spirit of gratitude is not wholly extinct cannot be irretrievably bad. He must have redeeming features of some kind. It is this thought that has raised me from a temporary Slough of Despond, and it is you, dear Mrs. Dimpfel, who have been the cause of this pleasurable reaction, for to you I feel deeply, overwhelmingly, almost tearfully grateful. When the news reached the metropolis that one of Baltimore's fairest society queens was about to start upon a dramatic career, a

dreadful, benumbing weariness crept over me, with a direfully paralytic effect. I felt that you would be sickeningly paragraphed ; that there would be a resurrection of your ancestry, and months of tedious preparation. For what? For another Juliet to weep in a fashionable lace-handkerchiefed way over her Romeo; for an additional Pauline to gurgle with lady-like, stereotyped pathos over her deceptive Melnotte, or for the latest Rosalind to coquet in a drawing-room man-ner with an artient Orlando. Can you wonder at the benumbing weariness atoresaid? For the noble, soif sacrificing way in which you have reso u ely declined to appear as the conventional star; for the beautiful heroism

conventional star; for the beautiful heroism with which you have shut your eyes to all visions of glor ous floral offerings made by a decoilete, dress-suited audience, you have sarned the everlasting gratitude of many good, brave men, whose dramatic sufferings, believe me, are already all that they can bear and live.

It is this heroic behavior on your part, dear Mrs. Dimpfel, that prompts me to pen you these lew lines. I assure you that this page is not wholly unsp ashed by tears, though owing to the imperfection of the compositor's art you may not be able to see them.

cai mind much may be written that will aid you if you still persevere in your idea of ado ting a stage career. You may succeed in comedy, tragedy, larce or buriesque. It is impossible even to imagine for which you may be best suited, your work in "The Paymaster" being so tintless.

Your role in Mr. Harrison's play calls for a mild amount of patho; but, dear Mrs. Dimpfel, you do not appear to realize that fact. In the harrowing situation where you are about to be apprised of your brother's death, and you exclaim, "Is my brother ill, hurd? Oh, speak! speak!" you might be mildly saying at the dinner table, "Kindly pass me the sal," for all the emotion you express. I am convinced that you are naturally vivacious; that in real life, in a similar situation, you would be wildly perturbed. You must remember that the smiles of an audience at a time when a situation calls for tears are absoime when a situation calls for tears are abso-You ask, "What shall I do? What shall I

You ask, "What shall I do? What shall I do?" when your hearers are supposed to be dissolved in tears, just as you would make that interrogation to a dressmaker who had "disappointed" you. You would probably express even more emotion to the dressmaker. There is a bivalvian placidity, a moliuscous serenity about your grief that is positively irritating—if you will pardon this irankness. It really does seem strange that society women should be so utterly strange to stage methods. I heard somebody say on a certain occasion that the life of a successful society woman was nothing more nor less than a

NATURAL TRAITS WILL SHOW OUT.

A Small but Active and Plucky Man in a Tight Place.

It does not require great battles or events of national importance to bring out the natural traits of some people, says the kansas City Star. This morning a small but certain rules that must be learned. They are absolutely essential. Even what we ignorantly call "a born actress" (why should a woman, by the bye, be born to be anybody woman, by the bye, be born to be anybody but herself?) must bow her head in subjec-

tion to them.

The refinements of society count for very little upon the stage. If you should ever be called upon, during your stage career, to im-personate a character representing your former self, you will be obliged to learn new methods, but should you at any time return to your drawing-rooms, and fry these new methods there you will be termed theatrical

methods there you will be bermed thearrical and smiled at as a poseuse.

You have a very great deal to learn, Mrs. Dimpfel, but you do not look like one to be frightened at the idea of close application to dramatic study. The courage you have manifested in facing a metropolitan audience unprepared indicates a strength of character. unprepared indicates a strength of character which, directed in the right channels, may accomplish a great deal. You have started upon your career without such tinsel illu-minated advance agents as Worth, the Prince of Wales, or a judicious selection from the House of Lords. All that is strongly in your favor, believe me, my dear Mrs. Dimpfel. ALAN DALE.

"For years I have suffered from absorces which always formed on the best of my neck, and had to be cut from time to time to obtain railef. I used all sorts of blood purifiers, but without avail. The abscesses would always reappear. I suffered very much pain until my physician advised me to use the genuine imported Oxfa-bad Sprudel Salt (powder form). I used this for about four weeks, and since that time I have been entirely free from the disease. My complexion cleared, and I have enjoyed good health ever since. I cannot speak too highly of this really valuable remedy, and have re mended it to all my friends, who also speak of its won-derful effects as a lazative. Yours very respectfully, "I. MEYERS,"
